Abstract

The behavior of RPC detectors is highly sensitive to environmental variables. A novel approach to model the behavior of RPC detectors in a variety of experimental conditions. The algorithm, based on Artificial Neural Networks, has been developed and tested on the CMS RPC gas gain monitoring system during commissioning.

<https://arxiv.org/abs/1012.5508v1>

Key words: RPC, CMS, Neural Network, muon detectors, HEP

Version of Record

1. Introduction

Resistive Plate Chamber (RPC) detectors [1] are widely used in HEP experiments for muon detection and triggering at high-energy, high-luminosity hadron colliders [2,3], in astrophysics experiments for the detection of extended air showers [4], as well as in medical applications [5]. At the LHC the main system of the CMS experiment [6] relies on drift tubes, cathodoluminescence chambers and RPC [7].

In this paper a new approach is proposed to model the behavior of an RPC detector, by a software program. The algorithm, based on Artificial Neural Networks (ANN), allows one to predict the behavior of any detector as a function of a set of variables, once enough data available, providing a fitting to the ANN. At present, data available for training the ANN are limited to atmospheric pressure p and relative humidity H . Further studies including radiation dose d and temperature T will be the subject of a forthcoming paper.

In a preliminary phase we trained a neural network with just one variable and found that the ANN improved after adding more variables into the network. The approach based between data and prediction has to be considered a pessimistic evaluation of the validity of the algorithm, since it also depends on the presence of unknown variables not considered for training.

The data for this study have been collected utilizing the gas gain monitor (GGM) system [9–11] of the CMS RPC monitor detector during the commissioning with cosmic rays in the test area at CERN.

The GGM system is composed of the same type of RPC used in the CMS detector (2 mm thick Mylar gaps) but with a larger size (50 cm \times 50 cm 2). Two gas mixtures are used. The trigger is provided by four out of 12 gaps of the stack, while the remaining eight gaps are used to monitor the working point by means of a complementary telescope having two RPC detectors.

Initially, the GGM was calibrated in a stop mode using a radioactive source. Subsequently, the GGM was put in an open mode using a radioactive source. The data from the two modes were used to obtain the calibration factors. The data obtained in open mode were used to fit the simulation at the same conditions on the GGM. The comparison in predicting the measured GGM chamber operation mode as a function of the measured variables and different high voltages, fixed for each chamber, in order to determine the total rate of the GGM modes of the gaps (Table 1).

The operation mode of the RPC changes as a function of the voltage applied, in particular the chamber will change from streamer mode to shower mode when increasing HV.

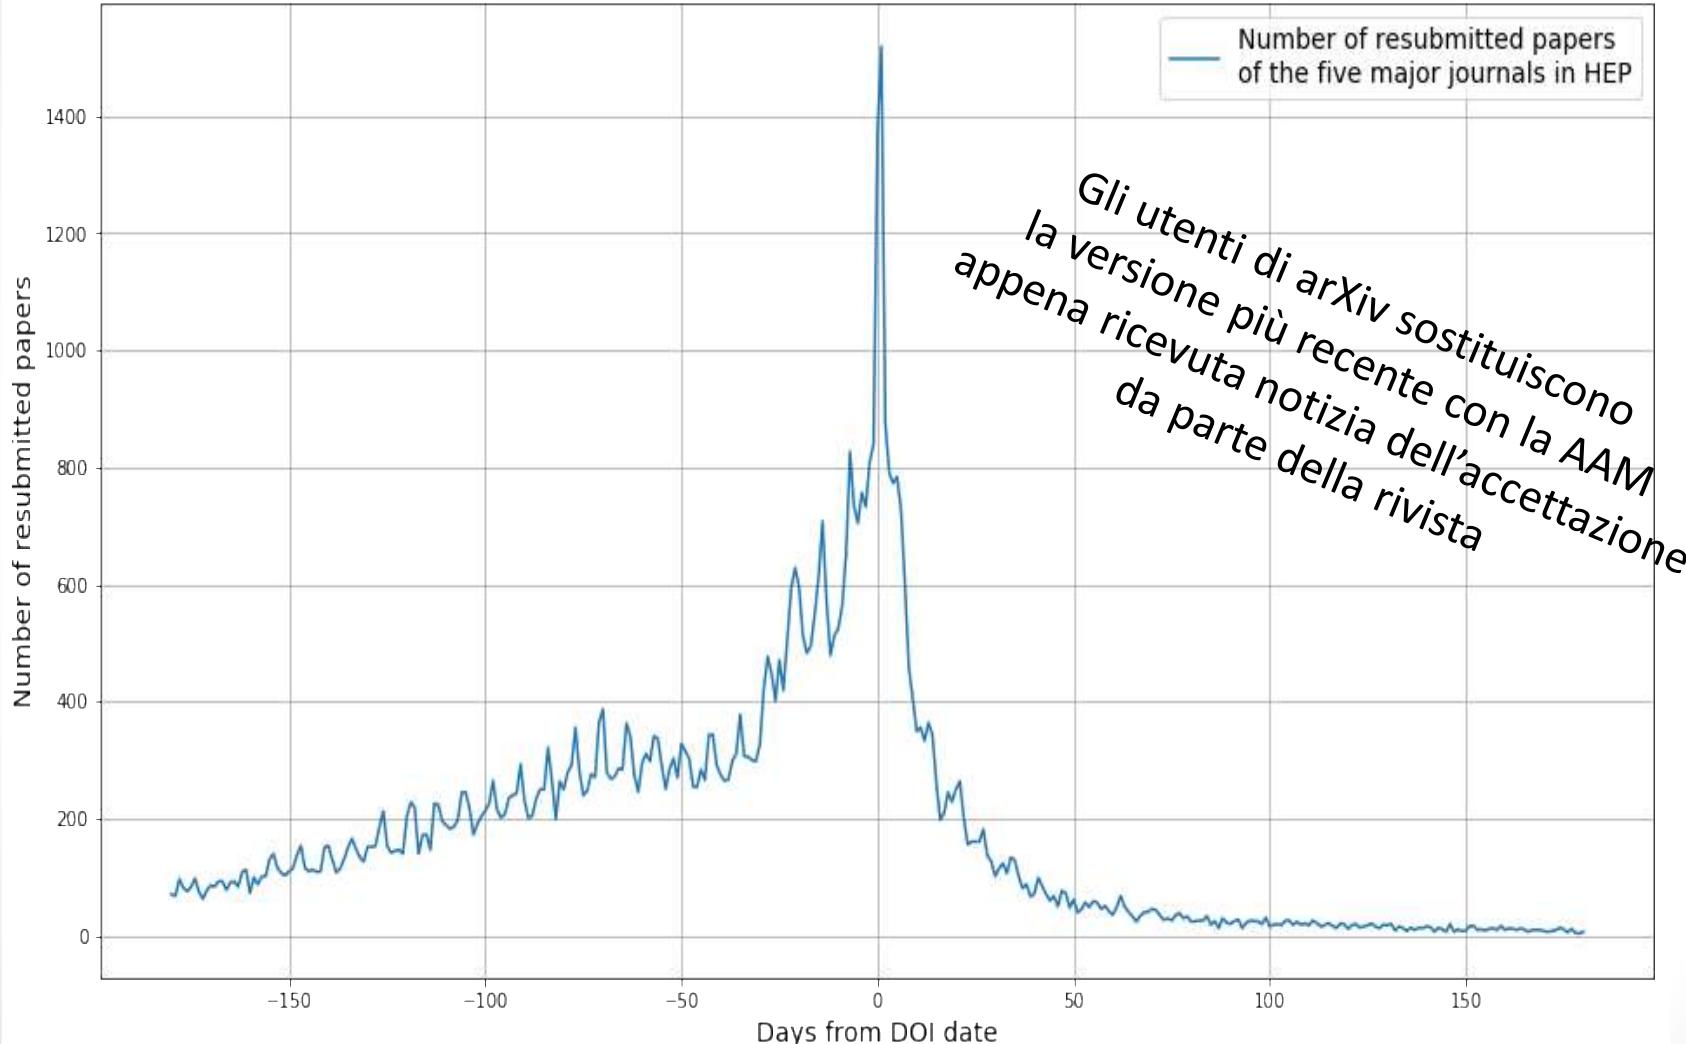

2. The Artificial Neural Network simulation code

An Artificial Neural Network (ANN) is an information processing paradigm that is inspired by the way biological nervous systems, such as the brain, process information [12]. The most

Publishing licences and compliance with open access mandates

Nature Research author licence policy

This policy applies to all journals published by Nature Research, including *Nature* and the journals with "Nature" in their titles. Nature Research's policies are compatible with the vast majority of funders' open access and self-archiving policies. Please see [here](#) for exceptions.

Nature Research does not require authors of original (primary) research papers to assign the copyright of their published contributions. Authors grant Nature Research an exclusive licence to publish, in return for which they can reuse their papers in their future printed work without first requiring permission from the publisher of the journal.

For commissioned articles (for example, Reviews, News and Views), copyright is retained by Nature Research.

General information about licensing policies and re-use can be found at the [reprint and permission website](#).

Creative commons licences

Nature Research open access and hybrid journals

All open access articles published in Nature Research Journals are published under Creative Commons licences. Please see the licence section on individual journal websites for more information, for example: [Nature Communications](#) and [Scientific Reports](#).

WILEY
 Publish & Read: a step forward in the transition to open access
 The agreement, and what it means for authors, readers and the open access landscape
 In January 2019, Projekt DEAL and the global publisher Wiley concluded a nationwide Publish & Read agreement to enhance the future of scholarly research and publishing in Germany. The agreement grants:

- Open access publishing of an uncapped number of articles by corresponding authors of DEAL affiliated institutions, in Wiley hybrid and pure gold open access journals, at no extra costs for the author.
- Copyrights stay with authors who have complete freedom of choice in license and are proposed CC-BY by default.
- Read access and permanent access for all DEAL participating institutions to all Wiley Online journal content including backfiles from 1997

 The details of the contract and an FAQ can be found at www.projekt-deal.de/wiley-contract

UC terminates subscriptions with world's largest scientific publisher in push for open access to publicly funded research

UC Office of the President

Thursday, February 28, 2019

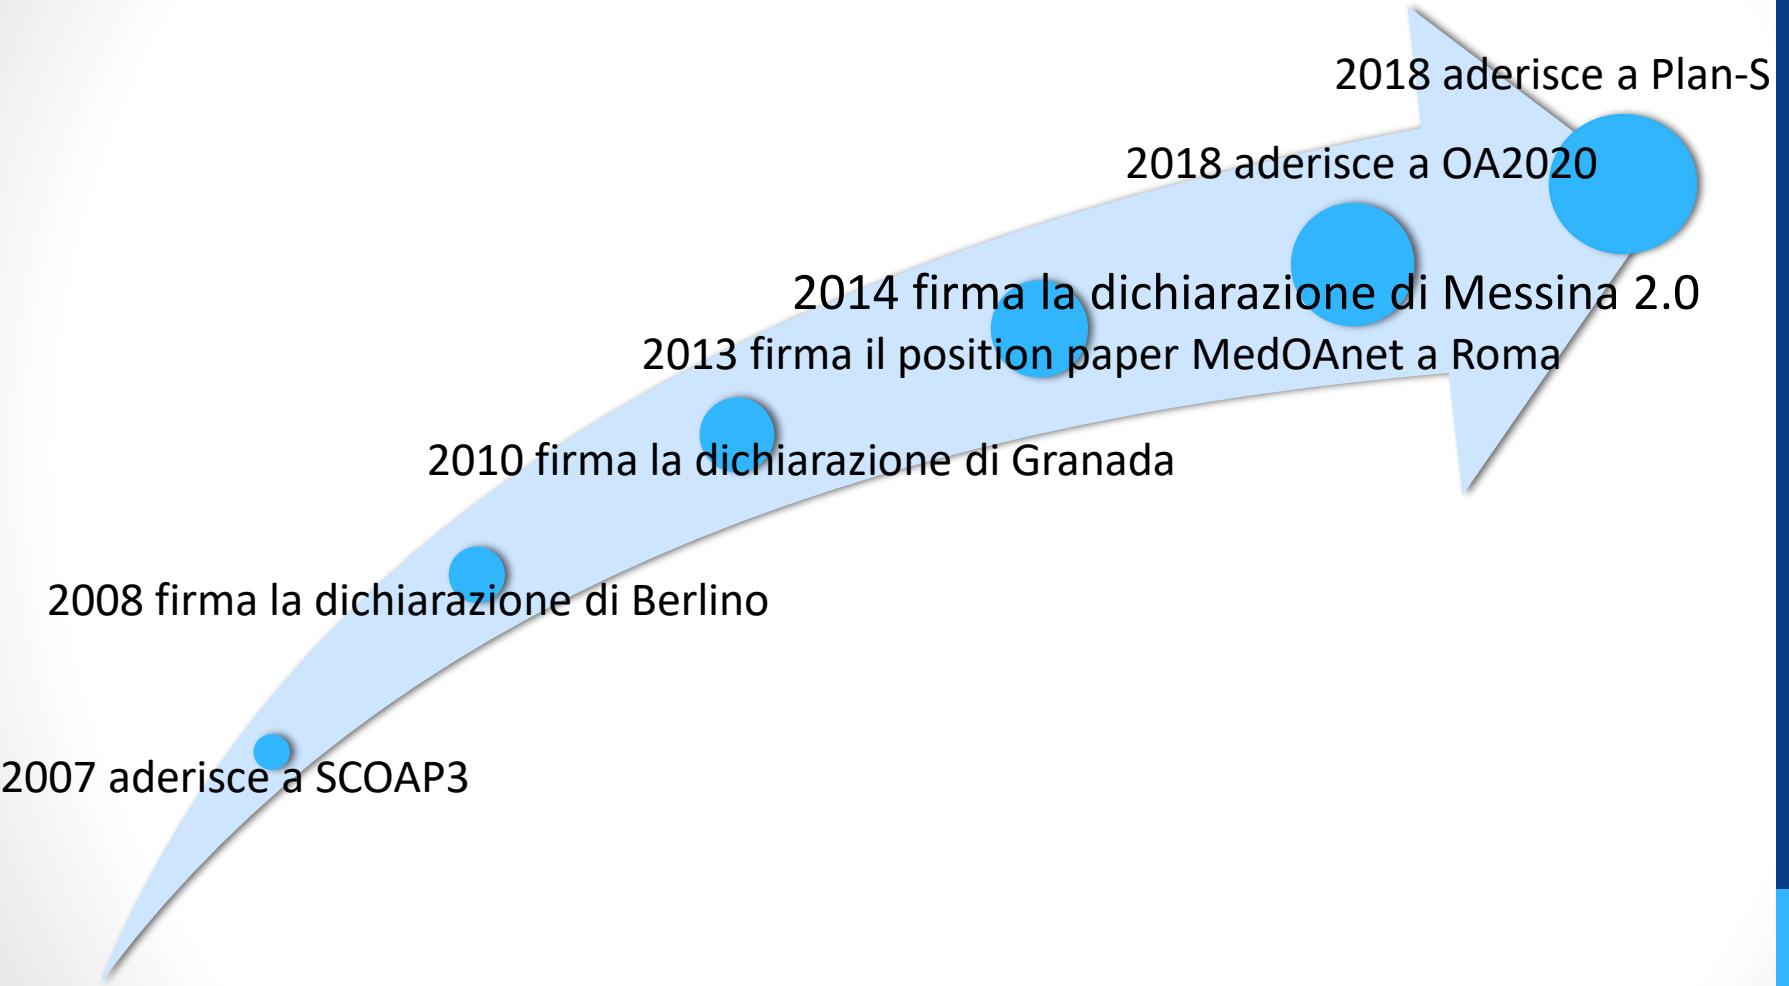

As a leader in the global movement toward open access to publicly funded research, the University of California is taking a firm stand by deciding not to renew its subscriptions with Elsevier. Despite months of contract negotiations, Elsevier was unwilling to meet UC's key goal: securing universal open access to UC research while containing the rapidly escalating costs associated with for-profit journals.

In negotiating with Elsevier, UC aimed to accelerate the pace of scientific discovery by ensuring that research produced by UC's 10 campuses — which accounts for nearly 10 percent of all U.S. publishing output — would be immediately available to the world without cost to the reader.

In Italia coordinato da INFN **con collaborazione di CRUI e Università` ed EPR partner**
- converte in OA le riviste di HEP teorica e sperimentale
- PTEP, PRL, PRD, PRC, NPB, JHEP, EPJC, CPC, AHEP, APPB (Springer/EPJ/SISSA, Elsevier, APS, Oxford UP/JPS, Hindawi, Jagiellonian UP, IOP/CAC)
- I fondi di abbonamento vengono convertiti in APC senza costi aggiuntivi
- Riviste selezionate dopo una gara: PREZZO & QUALITÀ
- APC medio 1150EUR

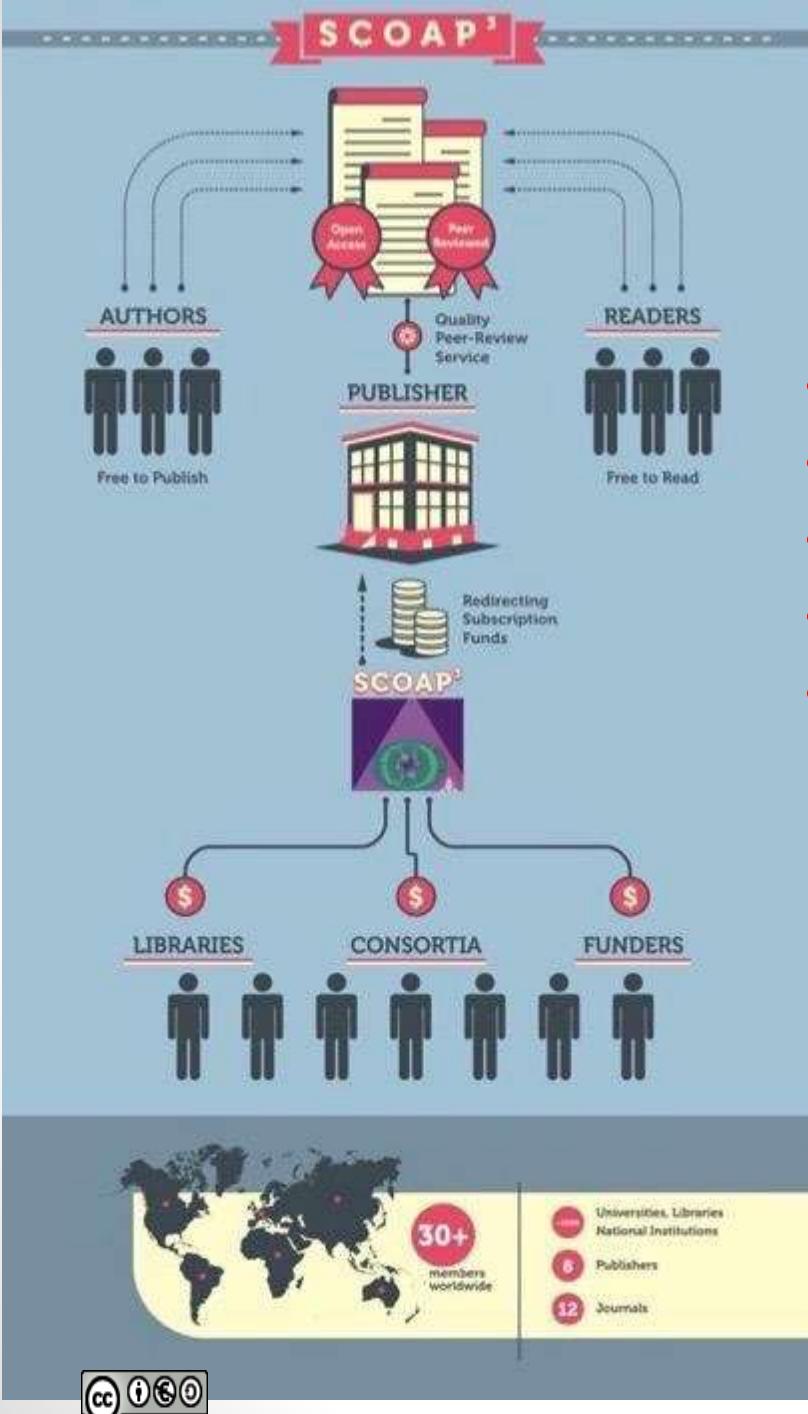

Sponsoring Consortium for OAP in Particle Physics

- Plan S è un'opportunità e una sfida
 - No al modello ibrido
 - No all'uso dell'IF nella valutazione
 - spinta per green OA e repositories
- Verso contratti di transizione (*transformative*)
 - Germania, ma trasferibilità al modello italiano ?
- Proposta di Legge Gallo-Lattanzio e nuova legge europea sul copyright (marzo 2019)

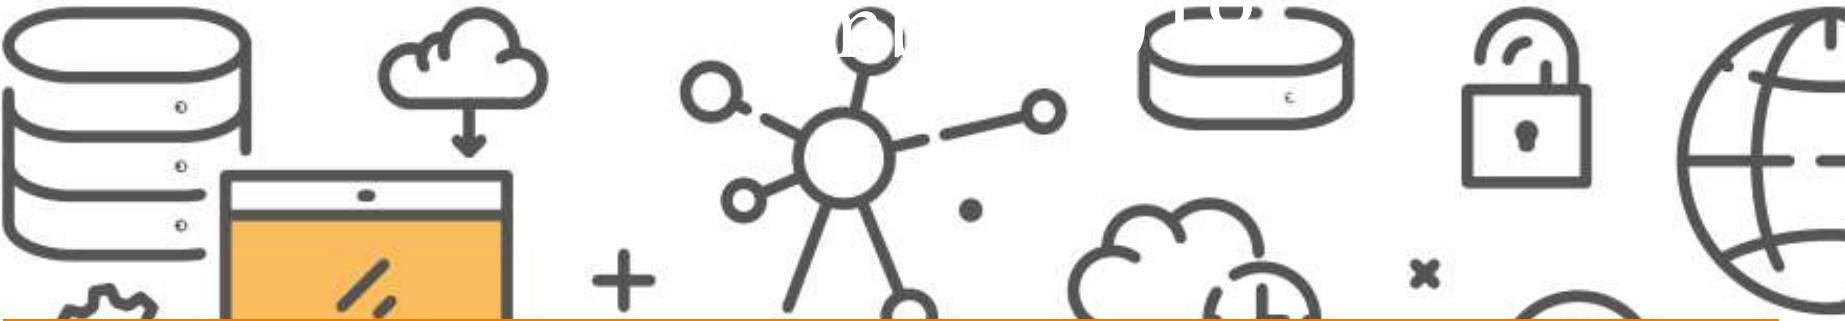

art. 9

- La Repubblica promuove lo sviluppo della cultura e la ricerca scientifica e tecnica. Tutela il paesaggio e il patrimonio storico e artistico della Nazione.

art. 33

- L'arte e la scienza sono libere e libero ne è l'insegnamento.

4 Settembre 2018

11 Istituzioni Finanziarie della Ricerca

lanciano Plan S

PLAN S: per un Open Access completo e immediato

Iniziato da Robert-Jan Smits inviato per l'Open Access della Commissione Europea

Sviluppato da Marc Schiltz Presidente di Science Europe

Lanciato da un gruppo di Istituzioni nazionali finanziarie della ricerca → cOAlition S con contributi dal European Research Council

10 Principles

01 Authors retain copyright of their publication with no restrictions. All publications must be published under an open license, preferably the Creative Commons Attribution Licence CC BY. In all cases, the license applied should fulfil the requirements defined by the Berlin Declaration;

02 The Funders will ensure jointly the establishment of robust criteria and requirements for the services that compliant high quality Open Access journals and Open Access platforms must provide;

03 In case such high quality Open Access journals or platforms do not yet exist, the Funders will, in a coordinated way, provide incentives to establish and support them when appropriate; support will also be provided for Open Access infrastructures where necessary;

04 Where applicable, Open Access publication fees are covered by the Funders or universities, not by individual researchers; it is acknowledged that all scientists should be able to publish their work Open Access even if their institutions have limited means;

05 When Open Access publication fees are applied, their funding is standardised and capped (across Europe);

06 The Funders will ask universities, research organisations, and libraries to align their policies and strategies, notably to ensure transparency;

07 The above principles shall apply to all types of scholarly publications, but it is understood that the timeline to achieve Open Access for monographs and books may be longer than 1 January 2020;

08 The importance of open archives and repositories for hosting research outputs is acknowledged because of their long-term archiving function and their potential for editorial innovation;

09 The 'hybrid' model of publishing is not compliant with the above principles;

10 The Funders will monitor compliance and sanction non-compliance.

PLAN-S : i principi in sintesi

- **No** finanziamento per pubblicazione su riviste con **double-dipping**
- Se **mancano riviste** adatte: impegno a **crearle**
- **Pubblicazione immediata** senza embargo su riviste /archivi Open Access
- **Copyright** rimane **all'autore**
- **Tetto** agli Article Processing Costs (**APC**)
- In essere dal 1 ° **gennaio 2020** (per nuovi finanziamenti)
- **Timeline** per l'Open Access per **monografie e libri più lunga** del gennaio 2020

Novembre 2018

Plan S - Guida all'Implementazione

Le 3 vie

Riviste OA o Piattaforme OA	Archivio su repository Open Access	Accordi di Trasformazione
Gli autori pubblicano su giornale Open Access conforme a Plan S o su piattaforma Open Access con licenza CC BY, conforme a Plan S	Subito dopo la pubblicazione di un lavoro, gli autori depositano la versione pubblicata (Version of Record) o il manoscritto accettato dall'autore (Author's Accepted Manuscript, AAM), in un repository conforme a Plan S. Il documento è reso disponibile immediatamente ad Accesso Aperto (senza embargo) sotto una licenza CC BY.	Gli autori pubblicano Open Access con licenza CC BY su giornale ad abbonamento che sia coperto da un accordo di trasformazione, ovvero ha un impegno chiaro e specifico per una transizione completa a Open Access.

1

gold OA

2

green OA

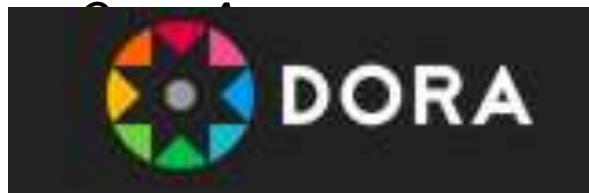

3

Plan S e Valutazione della Ricerca

⦿ «Ci impegniamo a rivedere radicalmente il sistema premiale della scienza, partendo dalla Dichiarazione di San Francisco sulla valutazione della ricerca» *cOAlition S - for the Realisation of Full and Immediate Open Access*

DORA - San Francisco Declaration On
Research Assessment

<https://sfdora.org/>

Valutare la ricerca scientifica per i suoi meriti
intrinseci piuttosto che sulla base della rivista in cui
viene pubblicata **NON USARE I.F.**

TIMELINE & REVIEW

- La tempistica per l'attuazione di Plan S può variare tra le organizzazioni membro
- L'implementazione di Plan S partirà da Gennaio 2020, con effetto su
 - grant esistenti,
 - nuovi progetti / grant
 - **nuovi bandi**
- Nel 2023 cOAlition S avvierà un processo formale di esame degli effetti di Plan S.

COAlition S: chi?

ad oggi 19 enti finanziatori delle ricerche

Physical Sciences, Life Sciences, Social Sciences , Humanities (> 10 G€/anno)

National public funders

Europe 13 Institutions

- o FWF AUSTRIA
- o ANR FRANCIA
- o AKA FINLANDIA
- o SFI IRLANDA
- o INFN, ITALIA
- o FNR, LUSSEMBURGO
- o NWO, OLANDA
- o RCN, NORVEGIA
- o NCN, POLONIA
- o ARRS, SLOVENIA
- o FORTE, SVEZIA
- o FORMAS, SVEZIA
- o UKRI, UK

Africa:

- o Zambia: National Science and Technology Council
- Middle East;
- o Jordan: The Higher Council for Science and Technology (HCST).

Private Funders

Europe

- o Wellcome Trust (UK)
- o Riksbankens Jubileumsfond, Sweden
- o Compagnia di San Paolo, Italy

US

- o Bill and Melinda Gates Foundation

Supported by:

- European Research Council
- European Commission

Plan S: Dichiarazioni di Supporto

Oltre 25 dichiarazioni ufficiali di supporto «worldwide»

Eurodoc, Marie Curie Alumni Association e Young Academy of Europe
(organizzazioni di ricercatori)

Tra le più recenti:

dalla CINA

- Accademia delle scienze cinese
- National Science Foundation China
- Biblioteca nazionale scientifica e tecnologica, Ministero della scienza e della tecnologia
- OA2020 Mainland China Signatory Libraries (15)

dall'AFRICA

Accademia africana delle scienze

In cosa Plan S si differenzia da altre iniziative?

- Plan S mira ad allineare le politiche nazionali su OA
- Plan S comporta l'obbligo a OA - almeno green- da parte degli enti finanziatori
- Plan S stabilisce una tempistica chiara: dal 2020, OA per i nuovi progetti

Copyright senza restrizioni

Il copyright rimane all'autore con licenza di sfruttamento commerciale alla condizione di citare la fonte (licenza CC BY 4.0)

Riviste e piattaforme OA

Diversi requisiti tecnici tra cui registrazione in DOAJ (indicizza riviste on line ad accesso aperto, sottoposte a peer review)

Coordinamento

◎ <http://www.scienceeurope.org/>

Science Europe (2011)

Associazione di 36 Istituzioni europee della Ricerca e di Finanziamento della Ricerca

Budget globale : 18 miliardi euro /anno.

Missione : condividere esperienze e pratiche - promuovere interessi comuni - sviluppare e attuare strategie comuni.

Piattaforma per indirizzare messaggi politici alle istituzioni europee, ai ricercatori, ai governi nazionali e al pubblico.

Impegnata nella promozione dell'Open Access.

Meccanismi di supporto per la creazione di riviste / piattaforme OA

cOAlition S intende

- ◉ identificare campi e discipline carenti in riviste OA.
- ◉ fornire incentivi alla creazione di riviste / piattaforme OA o a trasformare quelle esistenti

Plan S: Consultazione Pubblica

Da novembre 2018 a febbraio 2019

- Ricevute più di 600 risposte
- cOalition S: in tempi brevi nuova guida all'implementazione

Plan S: S.W.O.T.

precedente all'adesione

STRENGTHS

- reazione al modello double-dipping
- importanza deposito green-OA
- metodi valutazione non IF

WEAKNESSES

- no analisi del mercato, evoluzione APC
- no analisi esperienze simili (UK, etc)

OPPORTUNITIES

- compatibile con SCOAP3
- firma congiunta con OA2020
- obbligo deposito su OA-Repository
- riduzione spese per abbonamenti, conversione verso APC
- coordinamento con MIUR

THREATS

- risposta del mercato (APC ?)
- grandi collaborazioni : come se adesione non generale
- VQR/ASN/Accreditamenti Collegi Dottorato
- non-coordinamento con MIUR
- costi piattaforme conformi

* Article Processing Cost

Domande a cOAlition S

- **[Grandi Collaborazioni]:** Può facilmente sorgere un problema se non tutte le istituzioni nella Collaborazione aderiscono a Plan S. Può accadere che la maggioranza decida di non pubblicare la versione AAM* su repository certificato con zero embargo (Strada no. 2), e anzi decidere di pubblicare su rivista ibrida rifiutando la firma ai coautori cui la propria istituzione vieta di pagare la quota di APC
- **[Libertà di Ricerca]** Gli autori non sono liberi di scegliere la rivista su cui pubblicare. Questo è un limite alla libertà di ricerca.

*Authors' Accepted Manuscript

- **[Copyright]** Le riviste potrebbero imporre la firma di un accordo di trasferimento del copyright dopo l'accettazione dell'articolo e prima della sua pubblicazione. Se gli autori non firmano, non pubblicano il lavoro. Se firmano potrebbero vedersi vietato retroattivamente di pubblicare l'AAM e richiesto di rimuoverlo dal repository certificato con zero embargo.
- **[Valutazione della ricerca]** Il sistema di valutazione della ricerca italiana per la carriera universitaria (ASN) e per il ranking universitario (VQR) si basa sulla bibliometria. Parametri come IF e h-index possono essere inferiori per autori affiliati a Istituzioni in cOAlition S.

- **[APC e mercato]** Una volta che il mercato del sistema editoriale si baserà sugli APC, sarà impossibile fissare un tetto poiché evolverà dinamicamente. La guida all'implementazione di Plan S prevede gruppi di lavoro dedicati allo studio delle implicazioni economiche di un mercato basato su APC. Come/quando questo sarà implementato? Ci sono risultati? Non dovrebbero comunque essere disponibili prima di gennaio 2020?
- **[Supporto per i repository]** Il ruolo dei repository istituzionali e certificati è cruciale per la Route 2. PlanS dichiara il supporto. Ci saranno nuovi fondi disponibili per sviluppare i repository?

- **[arXiv]** arXiv è il repository principale in fisica. Allo stato attuale, non soddisfa i requisiti per essere certificato cOAlition S. Ci sono piani in proposito? → [arXiv's Feedback on the Guidance on the Implementation of Plan S](#)
- **[controllo e sanzioni]** Come sarà verificata la conformità delle pubblicazioni? Di che natura le sanzioni previste?
- **[Affiliazioni miste]** Nelle grandi collaborazioni è frequente avere un autore con due affiliazioni come verrà trattato il caso in cui solo uno dei due istituti aderisce a Plan S ?

- **[supporto agli archivi]** Gli archivi rivestono un ruolo cruciale. cOAlition S dichiara di voler sostenere gli archivi. Saranno disponibili fondi ad hoc ?
- **[editori accademici]** Alcuni editori accademici no-profit si ritengono differenti dagli editori puramente commerciali. cOAlition S come considera la questione ?

In attesa delle nuove linee guida

metà maggio

- I 600 commenti ricevuti sono stati studiati
- Le linee guida di implementazione avranno modifiche rilevanti
- I principi saranno conservati
- Fra le novità
 - Tempistica
 - Società scientifiche
 - Criteri di conformità degli archivi

• Gioco di squadra

- EPR
 - Università
 - Società scientifiche
 - CRUI e il consorzio CARE per la contrattazione nazionale degli abbonamenti
 - MIUR
 - ANVUR
 - editori disposti al dialogo
- **Molte domande, poche certezze**

- **svolge** una *tournée* informativa interna e presso gli Atenei
- **discute** al suo interno
 - policy deposito nell'archivio
 - metodi di valutazione non-IF
 - policy pubblicazione in gold OA

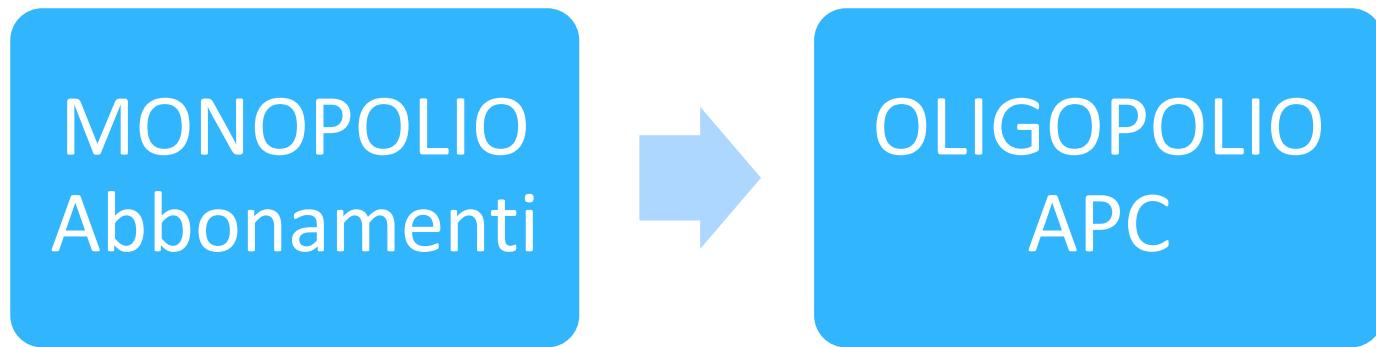

Conclusioni 1/2

- Plan S è un'opportunità e una sfida
 - critica alla bibliometria nella valutazione
 - spinta per green OA e repositories
- Transformative agreement (Germania/Wiley) applicabili al modello italiano ?
- iniziative legislative europee e italiane

criticità

- Mantenere il controllo sulla distribuzione della AAM
 - Occhio ai contratti
- Transire verso I contratti trasformativi
- Valutazione

Conclusioni 2/2

- Per approfondire:
 - Modifica alla legge italiana sul diritto d'autore (Caso)
 - La scienza aperta come scienza pubblica e democratica (Pievatolo)
- Proposta di archivio unico INFN
 - *openaccessrepository.it*
- **l'implementazione di Plan S ha dato risposta ad alcuni interrogativi ma altri ne rimangono**
- **è un gioco di squadra**
